

# PYRAMID FIBONACCI

The model of the geometric pyramid creates harmony in the room and energizes food and drinks

GEOTRANSMITTERS are not only receivers and senders, but also connectors, because they are based on sacred geometry and therefore the foundation of creation.

## The geometric pyramid

It corresponds to the octahedron of the platonic bodies, in which 2 equilateral square-pyramids are connected at the base (see diagram on the back). Thus, it receives and transfers its brisk and conserving energy.

## The Fibonacci Sequence

It corresponds to the infinite sequence of natural numbers, which starts with twice the number 1, then the sum of two consecutive numbers always equal the immediate following number: 0, (hier steht ja grade es fängt mit zweimal der 1 an und dann ist da eine Null) 1, 2, 3, 5, 8, 13, 21, 34, 55, ...

The numbers contained therein are called Fibonacci numbers. This sequence is called after Leonardo Fibonacci, who used it in 1202 to describe the population growth of rabbits. However, this sequence was already known in ancient times to the Greeks and Indians. Further research revealed, that the Fibonacci sequence can be used to describe numerous growth processes of plants as well. The Fibonacci sequence can be directly associated with the golden cut (see diagram on the back). The bigger the number of the sequence gets, the closer it gets to the golden cut (1,618033...) as a consequence of the division with the foregone number (e.g.  $13:8=1,6250$ ;  $21:13=1,6154$ ;  $34:21=1,6190$ ;  $55:34=1,6176$ ; etc.).

## Measurements

- The sizes are: basis 34, side 34, height 24 cm
  - Diameter of the sticks 5 mm
- (5 and 34 are also numbers of the Fibonacci sequence and are based on the spiral of the golden cut).

Research, production, and distribution of Geotransmitters for transferring vibration and energy.  
The name Geotransmitter is based on sacred geometry and comes from the latin word 'transmittere' for receiving, transferring, and sending, as well as the English word for sender, converter, and transformer.

### Sacred Geometry

Following vibration and frequency, space and dimension, light and color, tone and sound (finde diese differenzierung im englischen nicht), it needs a 5th counterpart to complete the material creation. Because for the manifestation of all there is, it needs sacred geometry, which carries the numbers of mathematics in it. Sacred geometry is also called the secret, hidden or hermetic geometry, as it shows what lies behind the physical existence of the universe.

### The 5 Platonic Bodies

Ultimately, there are only 5 geometric bodies within any physical existence, which underlie everything: the cube, tetrahedron, octahedron, dodecahedron, and icosahedron. The platonic bodies together constitute all basic forms, on which the structure of sacred geometry and creation are built on. Because all forms in our material world and creation are composed of one of these forms or their compounds. They are the basis of all manifestations, the atoms and crystals, the elements as well as cell structures of every living organism.

Platonic bodies exhibit the following fundamental features:

- Equal edge length
- Which are confined by equally sized areas
- Equal inner angles between the areas
- In a sphere, all corner-points touch the inside of the surface

### Area of Application of the Pyramid

Some tested and verifiable examples:

#### Space

When the Pyramid is positioned in the center of a room, it generates a harmonic field of subtle vibration.

#### Meditation and Prayers

Position the Pyramid in front of you while you meditate, or under the chair, or on your head. All spiritual and etheric connections are enhanced and stronger. (hier wird auf einmal mit YOU direkt angesprochen)

#### Water

It is common knowledge that the human body consists of 80-90% water. Clean water, as pure as possible, is a crucial factor for our health. Water is a substance, which can absorb the Pyramid energy very well to the extend, that it can change its quality. The taste of urban water improves after 24 hours under the Pyramid (for more information you can see Masaru Emoto, who conducted scientific research on water crystals).

#### Body Care

When the skin is washed with Pyramid-water, it turns softer and healthier. Personal care products are enhanced and harmful substances reduced. Through moisturizing and rinsing with Pyramid-water, hair is vitalized and shinier. Astonishingly, hair dandruff disappears after 4 applications (as research conducted by Norman Stark including 100 test persons has shown).

#### Eating and Drinking

All foods and drinks gain nutritive value and taste through energizing it. Even in sweet food and drinks, the taste is enhanced and acidity is reduced (e.g. gummi bears, fruit juice, or coffee). Drying herbs under the Pyramid helps to preserve color, healing power, and impact. This Geo-Transmitter is also very suitable for drying fruits (takes 2-4 weeks).

#### Healing

This Pyramid enables much deeper sleep, reduces sleep and concentration disorders, and promotes relaxation and soothing. When a headache occurs, it helps to place the Pyramid on the head. People who suffer from rheumatism and arthrosis can place the Pyramid under the bed, or the body parts are wrapped in aluminum foil after being energized under the Pyramid (ich glaube bei dem Satz ist auf deutsch was falsch). When suffering from stomach troubles, a glass of Pyramid water can also help well.

#### Animals

Also animal food can be energized with the Pyramid. Trials with dogs showed, that in 27 out of 30 cases, the dogs preferred the treated food to the untreated one. It is also interesting, that animals often lie next to the Pyramid, or they choose a place under a hanging GeoTransmitter (also see the Star of Harmony). Added Pyramid water to the aquarium keeps the fish healthier.

#### Plants

Seeds also take in the energy of the Pyramid and obtain higher yields. The yield is even better, when the water for germination is energized before. The life span of cut flowers in Pyramid-water is distinctively longer, and indoor plants stay provably healthier. Extensive research has shown growth differences of 35%.
