

PYRAMID MINTAGA

The model of the great pyramid of the scale 1:1000 creates resonating energy in the room and within us

The great Pyramid of Giza, Egypt

The measurements and angles of the greatest of the 3 pyramids in Giza were determined based on deep spiritual and mathematic knowledge. It starts with the startling placement, which requires the knowledge that the world is a sphere. The so-called Cheops pyramid is located on the 30th parallel. This North- South Pole divides the global landmass equally. Because this pyramid is located on the 30th parallel, it is equally distant from earth's center, as it is from the North Pole (da stimmt was nicht bei dieser Aussage). Therefore, it's location is a geodetic fixpoint and could have only been determined by someone who knew that the earth was a sphere, as well as the measurements of the landmasses and waters on earth! The length of one base side measures 365,342 Egyptian cubits (ich bin mir nicht sicher ob cubit der richtige ausdrück ist), which precisely equals the number of days in a year. The steep inclination angle of 52° shows the incorporation of the number Pi, because the height of initially 146,72 meters in relation to the perimeter of the base (921,44) stands in the same ratio as the radius of a circle to its scope ($2 \times \text{Pi}$). Thus, the pyramid is also a projection of the northern hemisphere.

MINTAGA was the prehistorical name of the great pyramid, ALTNITAG for the middle, and ALNILAM for the small pyramid, which were named after the three stars of the Orion belt.

Therefore, the pyramid model in its precise scale of 1:1000 is in resonance with the great pyramid of Giza, and represents a powerful energy-intensifier, wherever it is placed.

Measurements in the scale of 1:1000

- Egyptologic size: basis 230, side 220, height 146 cm
 - Original size: basis 233, side 221, height 144 m
 - Model size: basis 233, side 221, height 144 mm
 - Diameter of the sticks 3 mm
- (3, 144 and 233 are also numbers of the Fibonacci sequence and are based on the spiral of the golden cut).

Prices

- | | | |
|--------------------|------------|-----------|
| - Pyramid brazen | Euro 98.- | CHF 108.- |
| - Pyramid silvered | Euro 190.- | CHF 210.- |
| - Pyramid gilded | Euro 226.- | CHF 250.- |

Payment

Invoice with payment slip or bank transfer.

Delivery

Postal package plus postage or shipping charges, as well as possible customs.

Warranty

2 years on fabrication deficiencies without external influence.

Remark

Changes in the technical data and prices are reserved. All information given in this pamphlet are not verifiable by the current state of scientific knowledge. We indicate this for legal reasons.

Research, production, and distribution of Geotransmitters for transferring vibration and energy.
The name Geotransmitter is based on sacred geometry and comes from the latin word 'transmittere' for receiving, transferring, and sending, as well as the English word for sender, converter, and transformer.

GEOTRANSMITTERS are not only receivers and senders, but also connectors, because they are based on sacred geometry and therefore the foundation of creation. All of our Geo-Transmitters are based on the 5 platonic bodies and numbers of the Fibonacci sequence. They were produced in specific measurements and selected materials, and create subtle and energetic resonance fields, which are then utilizable for humans.

Sacred Geometry

Following vibration and frequency, space and dimension, light and color, tone and sound (finde diese differenzierung im englischen nicht), it needs a 5th counterpart to complete the material creation. Because for the manifestation of all there is, it needs sacred geometry, which carries the numbers of mathematics in it. Sacred geometry is also called the secret, hidden or hermetic geometry, as it shows what lies behind the physical existence of the universe.

The 5 Platonic Bodies*

Ultimately, there are only 5 geometric bodies within any physical existence, which underlie everything: the cube, tetrahedron, octahedron, dodecahedron, and icosahedron. The platonic bodies together constitute all basic forms, on which the structure of sacred geometry and creation are built on. Because all forms in our material world and creation are composed of one of these forms or their compounds. They are the basis of all manifestations, the atoms and crystals, the elements as well as cell structures of every living organism. Thus platonic bodies form the foundation of creation, on which everything was manifested, and allow through the connection of all the foundations of creation the manifestation of everything that we perceive around us.

Platonic bodies exhibit the following fundamental features:

- Equal edge length
- Which are confined by equally sized areas
- Equal inner angles between the areas
- In a sphere, all corner-points touch the inside of the surface

Comment:

*They are called "platonic bodies" because the Greek philosopher Plato was the one who showed their true cohesion and interpretation. He describes the universal cosmology in his opus Timaios, which he based on connected geometrical structures. However, the knowledge that these 5 geometrical bodies are the foundation of the universe, was known long before Plato. In the Ashmolean museum in Oxford, one can find models of platonic bodies that are dated 3400 years old, which means 1000 years before Plato.

And there are precise-made models of crystals in the museum in Cairo, which are dated 3000 years old.

Area of Application of the Pyramid

Some tested and verifiable examples:

Space

When the Pyramid is positioned in the center of a room, it generates a harmonic field of subtle vibration.

Meditation and Prayers

Position the Pyramid in front of you while you meditate, or under the chair, or on your head. All spiritual and etheric connections are enhanced and stronger. (hier wird auf einmal mit YOU direkt angesprochen)

Water

It is common knowledge that the human body consists of 80-90% water. Clean water, as pure as possible, is a crucial factor for our health. Water is a substance, which can absorb the Pyramid energy very well to the extend, that it can change its quality. The taste of urban water improves after 24 hours under the Pyramid (for more information you can see Masaru Emoto, who conducted scientific research on water crystals).

Body Care

When the skin is washed with Pyramid-water, it turns softer and healthier. Personal care products are enhanced and harmful substances reduced. Through moisturizing and rinsing with Pyramid-water, hair is vitalized and shinier. Astonishingly, hair dandruff disappears after 4 applications (as research conducted by Norman Stark including 100 test persons has shown).

Eating and Drinking

All foods and drinks gain nutritive value and taste through energizing it. Even in sweet food and drinks, the taste is enhanced and acidity is reduced (e.g. gummi bears, fruit juice, or coffee). Drying herbs under the Pyramid helps to preserve color, healing power, and impact. This Geo-Transmitter is also very suitable for drying fruits (takes 2-4 weeks).

Healing

This Pyramid enables much deeper sleep, reduces sleep and concentration disorders, and promotes relaxation and soothing. When a headache occurs, it helps to place the Pyramid on the head. People who suffer from rheumatism and arthrosis can place the Pyramid under the bed, or the body parts are wrapped in aluminum foil after being energized under the Pyramid (ich glaube bei dem Satz ist auf deutsch was falsch). When suffering from stomach troubles, a glass of Pyramid water can also help well.

Animals

Also animal food can be energized with the Pyramid. Trials with dogs showed, that in 27 out of 30 cases, the dogs preferred the treated food to the untreated one. It is also interesting, that animals often lie next to the Pyramid, or they choose a place under a hanging GeoTransmitter (also see the Star of Harmony). Added Pyramid water to the aquarium keeps the fish healthier.

Plants

Seeds also take in the energy of the Pyramid and obtain higher yields. The yield is even better, when the water for germination is energized before. The life span of cut flowers in Pyramid-water is distinctively longer, and indoor plants stay provably healthier. Extensive research has shown growth differences of 35%.
